

DOES YOUR TOILET WASTE WATER?

A leaking toilet can waste up to 500 gallons of water per day! Check for leaks and make repairs quickly to save water and money.

TIPS FOR FINDING TOILET LEAKS

- ▶ Add a few drops of blue food coloring into the toilet tank water, wait 15 minutes and if you see blue coloring in the toilet bowl, you have leak.
- ▶ Water sits in a toilet tank until it's flushed, but if the water level in your toilet tank is too high water will flow into an "overflow tube" and into the drain.

DON'T TRASH THE TOILET

Did you know trash like rags and plastics should never get flushed down the toilet? Trash can cause clogs in your own home and can cause blockages, overflows, and damage equipment at the city's 75th St. Wastewater Treatment Facility.

PAY YOUR BILL ONLINE

Did you know you can pay your water bill and see your water usage online? Visit, <https://MyBoulderUtilityBill.bouldercolorado.gov>.
